MR. GEO. S. PARKER

Mr. Parker's Promise in July 1933:

"We pledge the world's fountain pen dealers that this revolutionary VACUMATIC pen and this sweeping advertising program will lift the pen business to a new high plane of prosperity as the Parker Duofold did in 1922."

Mr. Parker's Fulfillment in the past 6 months:

"An increase of 32% in Parker Pen Sales"

Like "Knee-Action" in Motor Cars-

THE PARKER VACUMATIC PRINCIPLE IS THE 1934 SENSATION IN PENS

2 SEPARATE ADVERTISING CAMPAIGNS IN 11 MAGAZINES AT ONCE!

One campaign featuring Parker VACUMATIC Pens and Pencils, another selling Parker Quink, will send a continuous Parade of customers into stores of Parker Dealers.

This pictures the local coverage of 18 million Parker magazine and newspaper ads which will appear during the first half of 1934.

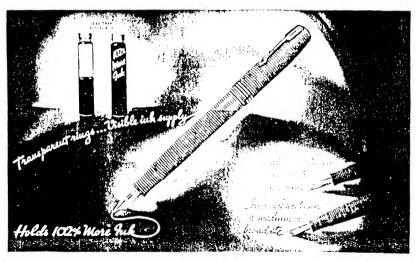

18 out of every 20 homes of native white families will be covered.

Nearly double the amount of Parker advertising that appeared the first 6 months of last year;

WHY THE SACLESS VACUMATIC

-with Ever-Visible Ink Supply-and Twice as Much of It-

WILL "TAKE YOU PLACES" IN LEARNING AND EARNING

And Why the Youth of America will Never Again be Slowed Down by Pens that run dry in the midst of their work!

Youth, with its vigorous spirit, has been quick to lead the great procession of alert-brained people who are easting aside their old-type rubber ink-sac pens and carrying this utterly new and basically different creation.

Save your old pen for sentiment, if you like, but give yourself—or your favorites—the one pen people have always wanted—never could have intil now. For not until now has a way been

Over-Size Vocumetic Pen, \$10, Pencil to Molch, \$3.50 Jet ar Colored Transporent Vocumetic Pen, \$5, Pencil, \$2.50 known to make a sacless pen without piston pump, valves, or old-time parts that fail to endure. That's why sac-type pens have ruled supreme, notwithstanding that 250 sacless pens were patented before this Vacunatic was invented.

But now neither old-time sac nor sacless pens can keep you abreast of this new-day efficiency in writing

Invented by a systematical the University of Wisconsin, and developed by Parker, the Varimante Filler forces ends the last objection to a fountain pensends having it run out of link ends having it quit on the job —in the molet of your setting. For it holds 1028 more ink than sacetype pens of equal size, and its temparent rings show the link within —show when to refill, if held to the light, Parker guarantees; in enchanically weefed.

Go to any stationer's, druggist's, jeweler's, or department store, and see how it fills by vacuum. And try writing different wass for different work with its All-Purpose Point—a point of precious Platform and Gold, Iridium tipped, perfectly formed to write on both sides without adjustment, and as smooth as the bearing of a watch

The revolutionary Vacumatic is styled mulike any pen you've ever seen before—a barrel as-vibet—rungs of Pearl and Jet, or Pearl and Transparent Amber—layer on layer—laminated—and yet non-breakable. Not only ultra-smart, but design rate tuck—brose wholly exclusive.

All stores selling pens are demonstrating daily, Don't deny yourself the privilege of trying this wonder of science. Go and see it today. The Parker Pen Company, Janesville, Wisconsin.

This lish Discevery Makes a Pen a Self-Cleaner. To get the best results from your new Yacumarie. Eliter-or (romm) pen - sale your dealer for Parker. Quieb. This new quote, drying, non chaging win one inh contains a server solvent list desires a pen are not provided to the provided of the provided of pensions. I now with list try bollers you buy desired. The pension of the pension of the pension desired to be the pension of the pension of the pension desired.

- THE PREFERRED POSITION -

Every four weeks throughout the year
Guaranteeing year-round turnover to Parker dealers.
Nine other magazines and Sunday newspapers are employed to create in the public the desire to own a VACUMATIC pen.

One Parker Innovation_at \$5.00

TO TRIPLE VACUMATIC SALES IN 1934

COLOR IN \$5.00 TRANSPARENT VACUMATICS

In seven short months, the Parker VACUMATIC Pen with its sparking beauty and basic improvements has brought about a rebirth of the highpriced pen business—has risen to complete and overwhelming dominance in the price range. Read what dealers say:

"Sold more Parker VACUMATICS than any other pens in the price range."

John E. Daly, Milwaukee, Wis. dealer

'Outsells all pens bought by students, regardless of price."

Crane's Student Supply, Minneapolis dealer.

"The acceptance accorded to the VACUMATIC line by the buying public has surpassed all our expectations; all orders sent in to you have been sold in their entirety before arrival of the goods."

The River Plate Supply Co., Buenos Aires Parker distributor in Argentine.

"Our stock of VACUMATIC Pens is exhausted, and we are sending you an order covering new stock."

Kelso-Jordan Sales Co., Cristobal Parker distributor in Panama and Canal Zone And this is what Parker is doing to make 1934 a record-breaking year for every pen dealer.

 New Transparent VACUMATICS in colors at \$5.00—Pencils to match \$2.50. This innovation promises to triple the demand for VACUMATICS —just as colors did when introduced in the Duofold at \$5.00.

 New Slender model in Transparent Pearl VACUMATIC at \$7.50.

 The New Parker Challenger line at \$2.50 for pen, \$1.25 for pencil and \$3.75 per pen and pencil set.

Parker now offers in the Parker Challenger a sac pen at \$2.50 which rivals many sac pens selling at \$5.00,—a full standard size pen with famous push hutton filler—a remarkable value that will outsell any sac pen made.

With these new lines, Parker now puts dealers in every market—from \$1.25 sac pens up to the Oversize VACUMATIC at \$10.00. Parker is backing dealers with a perfectly planned advertising campaign and a set of timely merchandizing plans which will mean more and bigger profits for Parker dealers. in 125

QUINK FLASHER DISPLAY F R E E !

With each Quink order for \$40.00 list, less discount.

QUINK FLASHER DISPLAY NO. 918

This beautiful, brand new Quink flasher is built on a semi-circular wooden base 18 Inches wide. Two strong upright panels—one in the shape of a gold pen, the other supporting the die-cut lettering "Quink"—are mounted into two grooves in the base.

The lamp with flasher is inserted from the back. A unique lighting effect is achieved because of the fact that the panel in the shape of the gold pen is covered with a gold metal foil and the board supporting the Quink lettering is covered with a silver metal foil.

If purchased in small quantities the cost of this stunning flasher would be prohibitive. But Parker placed a large order to enable every dealer immediately placing a \$40.00 list order for Quink to get one absolutely free. Place your order now—before all displays are taken.

The electric flasher can be supplied for either 110 Volts or 220 Volts. Since it will work on either A. C. or D. C. current, all we need know is whether your current supply is 110 or 220 Volts.
